A TABLE shewing the Time of Full Sea in all these places following.

	h m.
Brachy, portsmouth, Isle of Wight Dover peere, Coast of Flanders,	00 00
West end of the Nore, Walden, Rochester, Aberden, Gernsey,	00 05
Gravesend, Downes, before the Whelings, and all the Coast of Zeland,	01 30
London, Tinmouth, Hartle-poole all the Coast of Biscay, Galizia, and portugal,	03 00
Dongarvan, Kingsayle, Cork-haven, Baltemore, &c.	04 30
Plymouth, Datrmouth, Foy, Fulmouth, waterford, Youghill,	05 15
Ex mouth, Lymey, waymouth, before Burdeaux, at St. Malos,	06 00
Portland Rode, Winterton, Milford-haven, Birdgwater, Capeders.	07 20
Portland-race, poole, Cormer, Isle of man, Carmes, Dunbar,	09 00
North and South Forland, Dungeness Rode, Yarmouth Road, Harwhich and Dover, Dublin Bar. Chester, all the Coast of Ireland, to Carikfergus.	10 30
Rye Winchelsey, from wight to Beach Hampton before Margret:	11 15

the Moon coming to the South, according to her Air.

A TABLE

Moon	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30
Hou.	48	36	24	12	0	48	36	24	12	0	48	36	24	12	

To find the time of High water at any of the places above named

Example, what time will it be full *Sea* at *Plymouth*, the 9 th day of *January*, this Year? Find the *Moons* age in the Calendar 2, with which enter this Table, and under it is 1 ho. 36 min. then if note that you add the hours and minutes answering to *Plymouth*, which is 5 ho. 15 min. it gives the time of High water there, which is 6 ho. 51 min *Note*, That if the Two numbers added: make more than 12 the *Excess* above 12 shall be the time required.

In January plant timber trees and coppice wood; set all manner of quickſets, lop and prune great trees, and if the weather be ſeaſonable, lay dung on heaps, carrying it on the land in froſty weather; drein arable grounds, where you intend to ſow peaſe, oats and barly, plough up, or fallow the ground you keep for peaſe, water all ſuch meadows which you intend to improve (by artificial means, if not naturally ſupplied) which will greatly inrich the ground.

In your Gardens and Orchards plant vines, & other fruit trees, if the weather be mild; trench and dig your ground for beans and peaſe. Gather cyons for grafts, prune Orchard-fruit and Vines, if not froſty; dig Hop-gardens, turn up Bee-hives, ſprinkling them with warm ſweet wort, but let them be defended from the extremity of the winters cold, as well as from the Summers heat, both which are alike injurious.

February hath xxviii. days.

Now ſow all ſorts of oats, beans, gray-peaſe, fitches, ſpread dung before the plow, dung alſo your paſtures, ſet willow plants, poplars, oſiers, plant quickſets newly raiſed, and if the ſpring be mild, ſow muſtard ſeed, and hempſeed, ſoil meadows, which you cannot overflow with water, lop trees, and cut coppices.

And for your Garden and Orchard, if the weather be temperate graft the more forward ſort of fruit trees, prune the ſaid fruit trees, and cleanſe them from moſs and cankers, lay branches to take root, plant vines, trim up your palliſado hedges, ſet kernels, nuts, or ſtones of fruit, and other hard ſtones; ſow anniſe, beans, radiſh, peaſe, carrots, parſnips, onions, cabbage plants.

If the weather be mild, plant hops and dreſs them that are out of heart; look well to all hedges & fences, let your labour increaſe daily, leaſt the ſpring deſert you.

Fell timber you intend to bark, cleanse and rid the coppices, and if the season be dry, it is the best time to sow barly to prevent weeds, set osiers and willows before they are too forward; you may also throughout this month sow clover-grass, St. Foyn, and all other grass or hay.

In your Gardens and Orchards sow all sorts of garden seeds in dry weather, & plant all sorts of garden herbs in wet weather: plant French beans, cucumbers, melons, artichoaks, and all such tender seeds that could not abide the harder frost.

Transplant such flowers with fibrous roots you left unremoved in March, remove all tender shrubs, as Jesamines, myrtles, oleanders, &c. bring forth your tender plants you preserved in your conservatory, plant hops, & pole them, open the door of the beehives [illegible] industrious Bee may

In January plant timber trees and coppice woods; set all manner of quickſets, lop and prune great trees, and if weather be ſeaſonable, lay dung on heaps, carrying it on the land in froſty weather; drein arable grounds where you intend to ſow peaſe, oats and barly, plough up, or fallow the ground you keep for peaſe, water all ſuch meadows which you intend to improve (by artificial means, if not naturally ſupplied) which will greatly inrich the ground.

In your Gardens and Orchards plant vines, & other fruit trees, if the weather be mild; trench and dig your ground for beans and peaſe. Gather cyons for grafts, prune Orchard-fruit and Vines, if not froſty; dig Hop-gardens, turn up Bee-hives, ſprinkling them with warm ſweet wort, but let them be defended from the extremity of the winters cold, as well as from the Summers heat, both which are alike injurious.

February hath xxviii. days.

Now sow all sorts of oats, beans, gray-pease, fitches, spread dung before the plow, dung also your pastures, set willow plants, poplars, osiers, plant quicksets newly raised, and if the spring be mild, sow mustard seed, and hempseed, soil meadows, which you cannot overflow with water, lop trees, and cut coppices.

And for your Garden and Orchard, if the weather be temperate graft the more forward sort of fruit trees, prune the said fruit trees, and cleanse them from moss and cankers, lay branches to take root, plant vines, trim up your pallisado hedges, set kernels, nuts, or stones of fruit, and other hard stones; sow annise, beans, radish, pease, carrots, parsnips, onions, cabbage plants.

If the weather be mild, plant hops and dress them that are out of heart; look well to all hedges & fences, let your labour increase daily, least the spring desert you.

March hath xxxi. days.

Fell timber you intend to bark, cleanse and rid the coppices, and if the season be dry, it is the best time to sow barly to prevent weeds, set osiers and willows before they are too forward; you may also throughout this month sow clover-grass, St. Foyn, and all other grass or hay.

In your Gardens and Orchards sow all sorts of garden seeds in dry weather, & plant all sorts of garden herbs in wet weather: plant French beans, cucumbers, melons, artichoaks, and all such tender seeds that could not abide the harder frost.

Transplant such flowers with fibrous roots you left unremoved in March, remove all tender shrubs, as Jesamines, myrtles, oleanders, &c. bring forth your tender plants you preserved in your conservatory, plant hops, & pole them, open the door of the beehives that the industri ous Bee may have its liberty to reap the dainties of fragrant flowers.
